

# EUMaster4HPC

EUMaster4HPC is a 2-year innovative pan-European master program in HPC technology and use.

A program that will deliver academic excellence and offer prospective students outstanding career opportunities in businesses and research organisations.

It aims to equip prospective students with skills that are sought after in the competitive job market.

Join us! and study at one of the eight Awarding Universities:

**Be a Pioneer!**

**Be among the first students to study within the new European Master for High-Performance Computing (HPC)**

1st cohort of students starting September 2022

Application deadline 15 May 2022

<https://www.eumaster4hpc.tf.fau.eu>

Possibility of internships at innovative HPC companies that are partners of the Programme.

Scholarships available to eligible students.
